

The RYTHMIC Newsletter

Nr 31

By Mrs Egle ABRUZZINI, President of the Technical Committee

FIG Office Moutier (SUI), 18.02.2008

1. Clarification concerning the collaboration with “high risk”:

In the summary table of the group collaborations, the abbreviated description of the modality

↗ **RRR1 or 3** must be understood as follows:

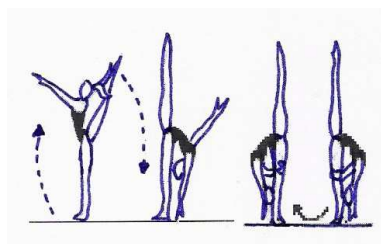

With throw + risk of losing visual contact with the apparatus during its flight + passing through the apparatus in flight (apparatus neither held by the partner, nor by the gymnast herself)	↗ RRR1 or 3	1 or 2 3 or more	0.70 0.80
---	--------------------	---------------------	--------------

This means that the criterion “passing through the apparatus in flight» must be added to the criteria of the previous risk (↗ RR). Therefore, a simple passing through the apparatus in flight is not enough for having the « high risk » (↗ RRR).

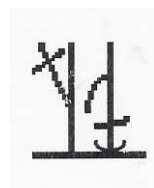

2. New difficulty approved by the CT:

The following flexibility difficulty is not an originality; its value can be calculated according to the existing criteria.

Description : back splits with help + back bend and change of support leg + front splits with back bend with « slow turn » of 180°.

Value - symbol:

J (1,00 point)
